Step 1

Why is SmartKey Transliteration required ?

SmartKey is an Intelligent Self-learning Software.

In ordinary Transliteration, after writing the word in English, we get some options.

Sometimes ଉଚ୍ଚିତ୍ତା word which we want to write is not present in those options.

Ordinary Transliteration depends on database which can never have all the words.

Hence writing ଉଚ୍ଚିତ୍ତା directly is a better option. This is SmartKey Transliteration.

In SmartKey Transliteration, those words which do not contain letters

ଡ ଡ ଢ ଢ ଶ ଟୋ are written directly.

example, ajay ଅଜୟ prateek ପ୍ରତୀକ charchaa ଚର୍ଚା
