

FAQ

Alt Key

SmartKey window closes when we press Alt Key in Windows 8 / Windows 10 ?

Close all other windows, and run SmartKey only, to use Alt Key combination to insert a letter.

email

How to login into email module of SmartKey ?

You need to adjust the security settings to login from another application.

For example, create an account in gmail, then

Goto, <https://myaccount.google.com/security>

Goto, Sign-in & security

Adjust, Allow less secure apps: OFF

Now you can use the ID and password for login

How to use mail merge using SmartKey ?

Go to Email - Build Database and make entries.

Compose a letter in SmartKey with <नाम> for mail merge.

Go to Email - Email. Enter your ' From Email ID ' and ' Password '.

Enter ' Subject ' and click ' To Email List '. Click ' Send ' button.

<नाम> will be replaced by name from the database, in the letter sent.

Open
